Page 1: Overview - Why are customers leaving, and what is it costing us?

Page 2: High-Risk Customers - Which active customers are most likely to leave next?

Which active customers are most likely to leave next ?

6,557 active customers show 2 or more warning signs (testing dataset)

Age Group: 18-30 | 31-45 | 46-55 | 56-65

High-Risk Customers: 6,557

Total Spend at Risk: 4M

Female

Male

Support Calls Group: Medium (3-5) | Low (0-2) | High (6-10)

Where do the at-risk customers sit?

High-Risk Customers by Contract Length

: Who should we contact first? The 50 highest-spending customers at risk

CustomerID	Age	Gender	Contract Length	Payment Delay	Support Calls	Total Spend	Risk Score
112	41	Male	Monthly	24	9	900	3
333	41	Male	Monthly	23	7	681	3
509	25	Male	Monthly	29	8	441	3
572	36	Male	Monthly	27	6	133	3
799	46	Male	Monthly	24	7	961	3
840	25	Male	Monthly	29	10	823	3
964	52	Male	Monthly	30	10	959	3
1120	63	Male	Monthly	22	8	705	3
1303	18	Male	Monthly	23	6	586	3
1552	21	Male	Monthly	25	6	255	3
1672	36	Male	Monthly	27	9	303	3
1722	54	Male	Monthly	26	10	260	3
1821	18	Male	Monthly	22	7	862	3
1842	33	Male	Monthly	30	10	971	3
2124	25	Male	Monthly	25	7	918	3
2160	23	Male	Monthly	26	6	363	3
2228	33	Male	Monthly	26	6	460	3
2241	36	Male	Monthly	28	9	417	3
2391	36	Male	Monthly	30	6	648	3
2405	42	Male	Monthly	27	9	283	3
2443	27	Male	Monthly	22	7	942	3
2607	29	Male	Monthly	23	9	941	3

What should we do with this list?

- Contact the 5,290 Monthly customers first
- Offer a discount to move them to a Quarterly or Annual contract
- Call anyone with 6+ support calls before they cancel

Source: public churn sample dataset, training file (440,832 customers) and testing file . Some groups show 100% churn, which suggests simulated data. Titles describe the full dataset.
